December 15, 2023

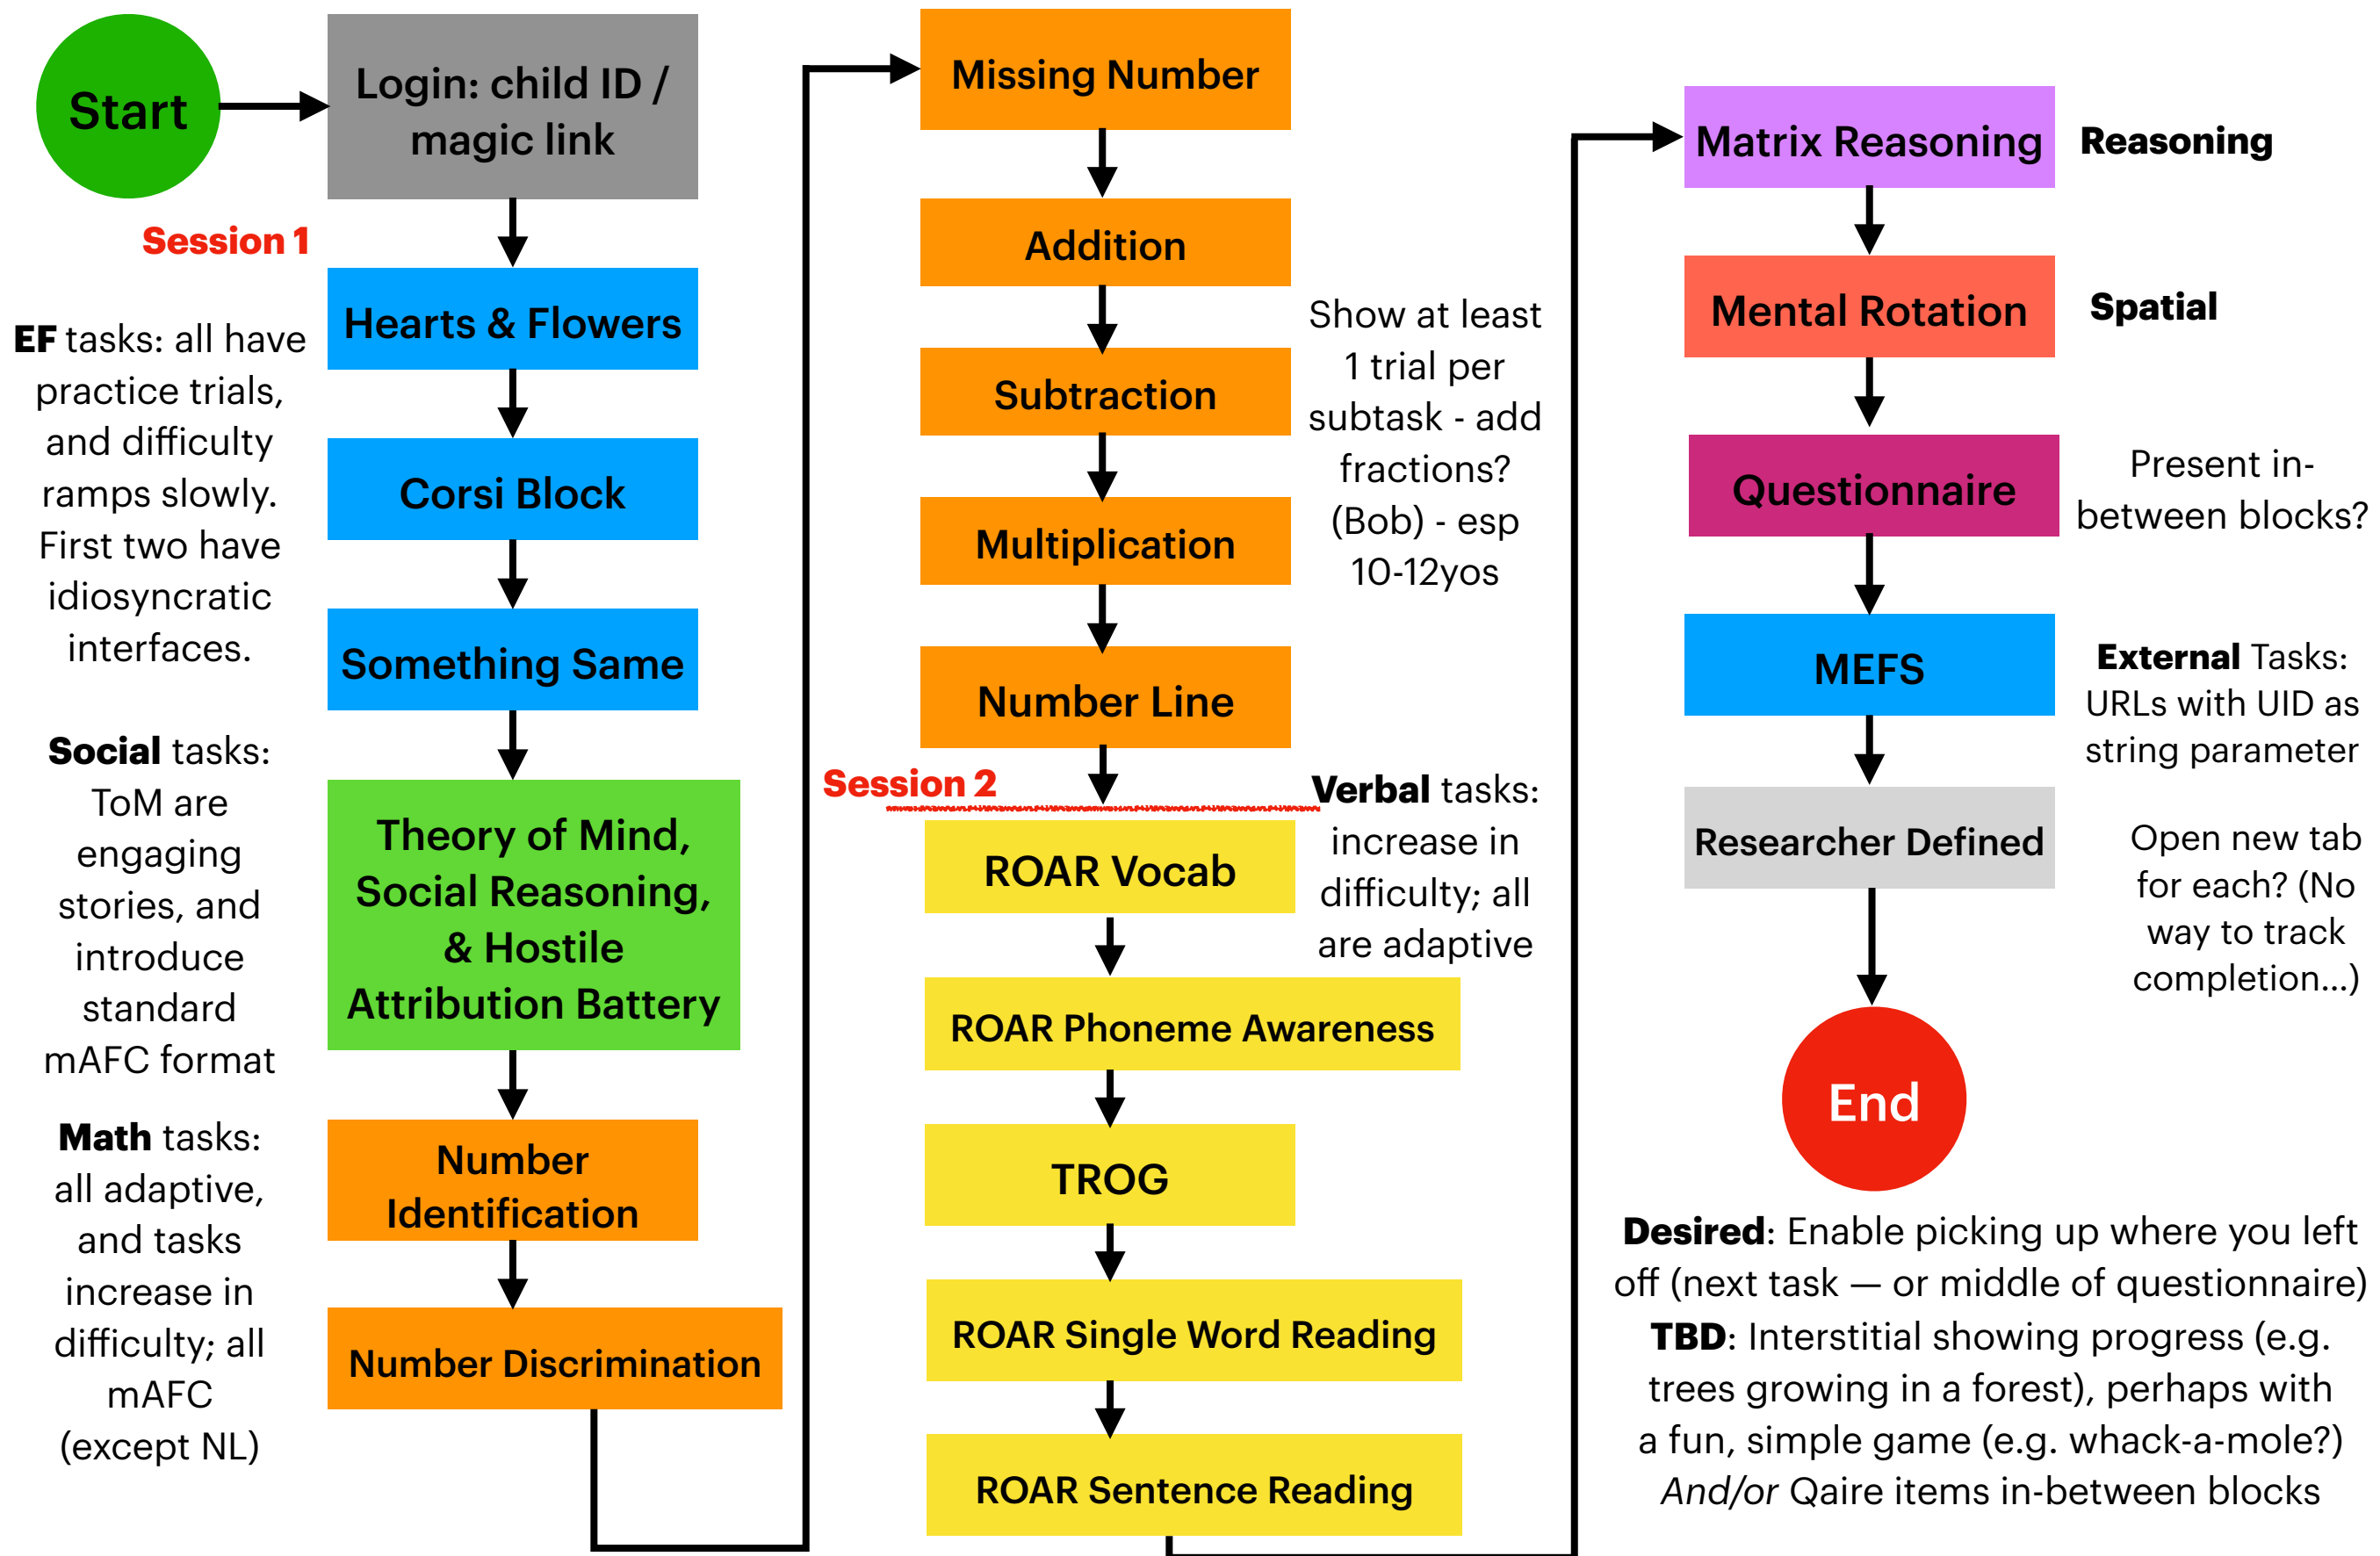

Questions

- We'll select a task order and keep it (researchers can't just arbitrarily reorder)
- Allow researchers to package tasks in different chunk sizes (e.g. send parent Qaires as 2 vs. 3 bundles)
- Manage versions of questionnaires (beyond internationalization): e.g., some sites cannot ask gender/sex/race/ethnicity questions - maybe just provide required multiple choice options for these questions?
- What dev plans does ROAR have for the dashboard?

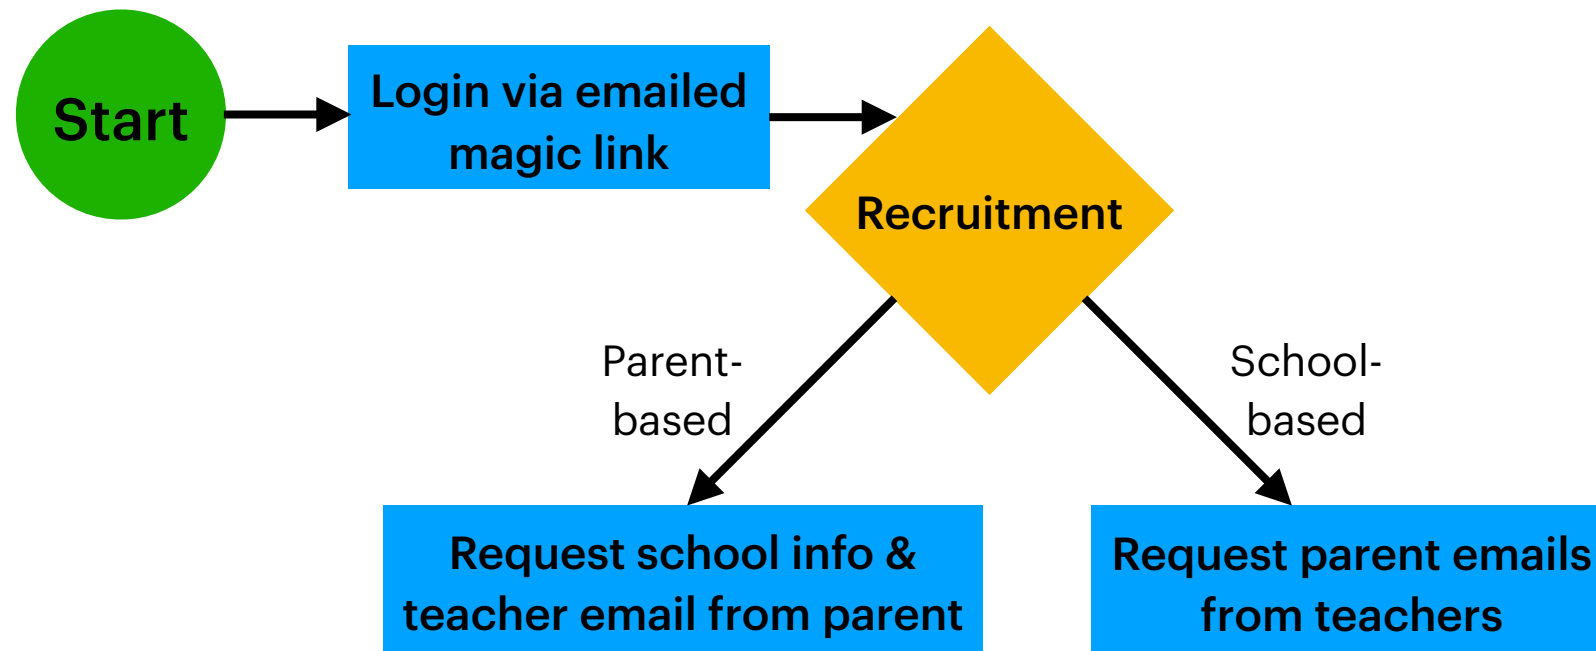

Site Researcher Flow

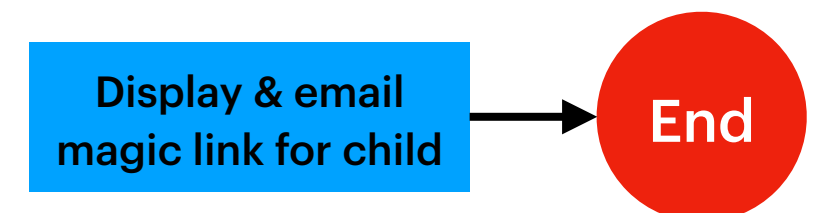

Child Participant Flow

Caregiver Participant Flow

Have the caregivers complete the form first, and then give them a magic link for the child?
(Is there ever a child-first flow?)

Teacher Participant Flow
